AIR CONDITIONING SERVICE PLANS

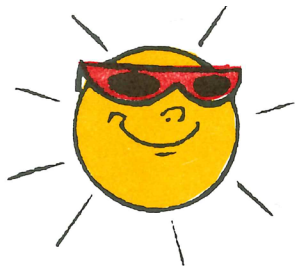

2026 COOLING SEASON

Robertson Fuel Oil is dedicated to ensuring that your air conditioning system runs at peak performance. We offer two plans that will provide assurance that your air conditioning is performing efficiently. We perform maintenance on all brands of central air conditioning units. Your satisfaction is our top priority.

Robertson Cooling Plan "A"

A preventive maintenance service that includes the following:

- Check air filter
- Check and clean condensing unit
- Check controls
- Check drip pan and drain
- Check electrical connections
- Check evaporator coil
- Check fan and motor
- Check fan belt
- Check operation
- Check refrigerant charge
- Check thermostat
- Check parts for visible wear

The allotted time for this service is approximately one & one half (1½) hours. Additional work performed (not described above) will be billed for time, at our prevailing rate, plus materials.

Robertson Cooling Plan "B"

This service plan covers labor on service calls for this cooling season only. Parts or refrigerant are not covered and will be billed accordingly. Labor is not covered, if the system failure is a result of 1) a fuse needs to be replaced, 2) circuit breaker needs to be reset, or 3) thermostat is not set properly. This plan does not cover labor for out of warranty compressors. In addition, labor is not included to replace cooling coils.

All Work to be performed during regular business hours:
Monday-Friday 8:00-4:00.

Plan "A" does not cover parts or service calls.

Plan "B" does not cover parts and does not include service required as a result of the customer's failure to: replace fuse, reset circuit breaker, or set thermostat properly.

Plan "B" does not cover labor for out-of-warranty compressors.

Plan "B" does not include labor replacement of cooling coils.
